

You may be spending 15% to 30% too much each and every month on electricity. If you are purchasing electricity and you have not compared competitive quotes from each provider, it is likely that you are. In addition, if you haven't let iPower6 bid out your electricity you may not be maximizing your savings and getting the best rate.

For the same reason that you book your hotels with Hotels.com, or your travel with Expedia or Travelocity, iPower6 can help you derive the best possible rates for your electricity purchase. iPower6 creates the competitive bidding environment that forces Retail Electric Providers to squeeze their margins and offer their lowest possible prices.

You should be using iPower6 for these 6 reasons:

1. iPower6 has repeatedly acquired rate quotes 15% to 30% below utility tariffs.
2. iPower6 will perform an analysis with a copy of just one recent bill, free of charge and without any further obligation.
3. In a week's time you will receive your cost savings analysis, complete with quotes from all providers, our recommendation and the overall costs savings available to your business all in a single concise document. (No Hassle Guarantee)
4. Switching providers is free and does not require installation or interruption of your service in anyway.
5. The new rates can be put into effect as early as your next billing cycle allowing you to realize the achieved savings almost immediately.
6. iPower6 is the largest energy broker with over 20 years experience working with 30 retail providers making sure you get the best rate possible.

A brief call will put things in motion. We welcome the opportunity to advocate on your behalf. Please call at your convenience.

Sincerely,

Patrick D. Hoffman, CEA, CPM | iPower6 | Energy Consultant
